**Hinweis zu Farbabweichungen**

Farbabweichungen zwischen der Darstellung in unseren Katalogen und auf unserer Webseite, entsprechend dem Ausdruck des Druckers und der Darstellung am Monitor, stellen technisch bedingt nicht reelle Farben der Materialien und der verschiedenen Ausführungen / Farben dar. Bitte bestellen Sie bei uns **Muster der Materialien** und Farben, wenn gewünscht. (siehe auch Seite 245)

**Note about colour variations**

Color representation will vary between our catalogues and website with printouts from printers and monitor displays. These cannot technically represent the true colour of the materials and the different finishes/colours. Please feel free to order **samples of materials** and colours from us. (see also page 245)

**Remarque sur les déviations de couleur**

Des différences de couleur peuvent exister entre la représentation dans nos catalogues et sur notre site Internet, selon l'impression de votre imprimante et la représentation à l'écran. Celles-ci ne représentent pas les couleurs techniques réelles des matériaux et des différentes finition/couleurs. Si vous le souhaitez, vous pouvez nous commander des **échantillons de matériaux** et de couleurs. (voir aussi page 245)

### Liebe Freunde von KÜBERIT®!

fast 50 Jahre nach der ersten Schutzrechtsanmeldung unserer zweiteiligen Fußbodenprofilssysteme blicken wir auf eine beeindruckende Geschichte zurück. Diese Profilart ist nach wie vor die erste Wahl für normgerecht verlegte schwimmende Hartböden, und unser PPS®-Champion hat sich als etablierter Markenname durchgesetzt.

Unser Ziel bei KÜBERIT® ist es, mit einer möglichst überschaubaren Variantenvielfalt sämtliche auf dem Markt erhältlichen Hartböden verlegen zu können. Da diese Böden nicht nur auf ebenem Untergrund, sondern auch auf Treppen verwendet werden, war es für uns selbstverständlich, auch dafür Lösungen mit zweiteiligen Profilen anzubieten.

Im Laufe der letzten Jahrzehnte haben sich unsere Produkte weiterentwickelt: Die Innenausstattungen in unseren Häusern und Wohnungen werden immer schöner und komfortabler, was den Bedarf an einteiligen Profilen (KÜBERIT® Best-Profile) erhöht hat. Diese Profile können Sägeschnitte abdecken, technische Fugen „verschwinden“ lassen oder, wie im Fall unserer Wandprofile, vertikale und rechte Winkel bilden und für saubere Schnittkanten sorgen.

Wir freuen uns, euch unseren neuen Gesamtkatalog präsentieren zu können, in dem ihr alles findet, was ihr für das Verlegen von Hart- oder Teppichböden, Tapeten oder Wandbelägen benötigt und – ganz neu – auch für das Fliesenlegen. Erstmals haben wir unsere Preislisten für Profilsysteme und KÜBERIT® Best-Profile in einem gemeinsamen Katalog zusammengefasst, um euch die Arbeit mit unseren Produkten zu erleichtern.

Viel Freude beim Stöbern und Entdecken, beim Verlegen und Renovieren sowie bei all den kreativen Projekten, die ihr mit unseren Profilen umsetzt. Wir freuen uns über eure Rückmeldungen und Fotos eurer besten Arbeiten – vielleicht finden diese im nächsten Katalog Erwähnung!

Wenn euch Nachhaltigkeit am Herzen liegt und ihr Ressourcen schonen möchtet, seid ihr bei uns genau richtig! Unsere Aluminiumprofile werden innerhalb der Europäischen Zollunion aus über 75 % recyceltem Aluminium gepresst – für ein besseres Leben für uns alle.

### Dear friends of KÜBERIT®!

Almost 50 years after the first patent application for our two-part floor profile systems, we can look back on an impressive history. This type of profile is still the first choice for floating hard floors installed in accordance with standards, and our PPS®-Champion has become an established brand name.

Our goal at KÜBERIT® is to be able to allow installation of all the hard floors available on the market with the widest possible range of product options. As these floors are not only used on level surfaces, but also on stairs, it was an obvious decision for us to offer solutions with two-part profiles for these applications as well.

Our products have evolved over the last few decades: The interiors in our homes and residences are becoming more and more beautiful and comfortable, which has increased the need for one-piece profiles (KÜBERIT® Best-Profile). These profiles can cover saw cuts, make technical joints “disappear” or, as in the case of our wall profiles, form vertical and right angles and ensure clean cut edges.

We are pleased to present you with our new comprehensive catalog in which you will find everything you need for installing hard floors or carpets, wallpaper or wall coverings and - brand new - also for tile installation. For the first time, we have combined our price lists for Profile Systems and KÜBERIT® Best-Profiles in a single catalog to make it easier for you to work with our products.

Enjoy browsing and discovering, installing and renovating with all the many creative projects you can implement with our profiles. We look forward to your feedback and photos of your best work - perhaps these will be mentioned in the next catalog!

If sustainability is important to you and you are interested in conserving resources, you've come to the right place! Our aluminum profiles are pressed from over 75% recycled aluminum within the European Customs Union - for a better life for us all.

### Euer KÜBERIT® Team Your KÜBERIT® team

**Nachhaltigkeit Sustainability Durabilité**

## **Umwelt und Ressourcen schonen – für eine bessere Zukunft!**

Wir bei Küberit® haben uns zum Ziel gesetzt, unsere Profile unter größtmöglicher Schonung von Ressourcen und Natur zu produzieren und zu vertreiben. Aluminium ist wertvoll - daher fertigen wir die Profile aus zertifiziertem Recycling-Aluminium. Das ist nicht nur gut für die Natur und die CO<sub>2</sub>-Bilanz, sondern auch für die Qualität! Derzeit verarbeiten wir rund 25% Primär- und 75% recyceltes Aluminium, also Sekundäraluminium. Durch diesen hohen Anteil besitzen unsere Produkte einen beachtlich guten CO<sub>2</sub>-Fußabdruck.

## **Protecting the environment and resources – for a better future!**

We at Küberit® have set ourselves the goal of producing and distributing our profiles with the greatest possible conservation of resources and nature. Aluminium is valuable - that's why we manufacture our profiles from certified recycled aluminium. This is not only good for nature and the CO<sub>2</sub> balance, but also for quality! We currently process around 25% primary and 75% recycled aluminium, i.e. secondary aluminium. Thanks to this high proportion, our products have a remarkably good CO<sub>2</sub> footprint.

## **Préserver l'environnement et les ressources - pour un avenir meilleur !**

Chez Küberit®, nous nous sommes fixés comme objectif de produire et de distribuer nos profilés en préservant au maximum les ressources et la nature. L'aluminium est précieux - c'est pourquoi nous fabriquons les profilés à partir d'aluminium recyclé certifié. C'est non seulement bon pour la nature et le bilan CO<sub>2</sub>, mais aussi pour la qualité ! Actuellement, nous transformons environ 25% d'aluminium primaire et 75% d'aluminium recyclé, c'est-à-dire de l'aluminium secondaire. Grâce à cette proportion élevée, nos produits ont une remarquable bonne empreinte carbone.

***It's not just the floor covering  
that influences the result;  
with the right accessories, the result will  
also remain beautiful in the long term.***

*Es ist nicht nur der Bodenbelag,  
der das Ergebnis beeinflusst;  
mit dem richtigen Zubehör bleibt  
das Ergebnis auch dauerhaft schön.*

**Sie benötigen nicht für jedes Loch einen Nagel!**  
 It is not necessary to nail every hole!  
 Il n'est pas nécessaire de clouer chaque trou!

Die leicht erhabenen Abstreikkanten helfen Ihnen beim Egalisieren und Erzeugen eine bruchfeste Kante.

The slightly embossed angle allows to fill an accurate edge that will not crumble!

Les arêtes à éraiser légèrement proéminentes permettent d'obtenir lors de l'application du mastic un rebord impeccable qui ne s'effrite pas!

**Verarbeitung/Aufbereitung**

1. Stufen vorbereiten
2. Treppenwinkel befestigen, (RW 20 / RW 38 mit den Schraubnägeln, RW S mit den Dübeln und Senkkopfschrauben)
3. Stufen mit Haftvermittler vorstreichen
4. Beispachteln (Egalisieren)
5. Anbringen der Treppenkanten-Profile
6. Belegen der Stufen

**Processing/Préparation**

1. Clean the steps
2. Fasten the stair repair angles, (RW 20 / RW 38 with the screw nails, RW S with the dowels and countersunk-head screws)
3. Apply bonding agents on the steps
4. Level by filling the step
5. Fix the stair nosing
6. Apply the flooring

**Traitement/Préparation**

1. Nettoyer les marches
2. Fixer les cornières de marche (RW 20 / RW 38 avec les clous taraudeurs, RW S avec chevilles et vis)
3. Appliquer au préalable une couche de fond d'agent adhésif
4. Mastiquer (égaliser)
5. Fixer les nez de marche
6. Paver les marches

**Das TK-SYSTEM besteht aus 2 kombinierten Teilen:**

1. der Metall-Treppenschiene aus Messing oder Aluminium
2. der PVC-Einlage (dazu passend)

**Die Verlegung ist denkbar einfach:**

- 1 Die Metall-Treppenschiene haben in ihrer Schwalbenschwanzführung (in die später die Einlage kommt) versenkte Bohrlöcher. Man verschraubt (Stein: verdübelt) die Metall-Treppenschiene auf der Stufe (Verklebung wurde bereits positiv durchgeführt).
- 2 Die PVC-Einlage wird im kalten Zustand auf das gewünschte Fixmaß geschnitten.
- 3 Durch die neu entwickelte Längsnut (Aussparung) an der Unterseite der Einlage wird ermöglicht, die PVC-Einlage im temperierten Zustand (Zimmertemperatur) zusammenzudrücken und sie mühelos - von oben - in die Schwalbenschwanzführung der Metall-Treppenschiene einzudrücken!

**Achtung! Sehr wichtig!**

Die PVC-Einlage wird in der Regel im kalten Zustand an die Baustelle gebracht. In diesem Zustand ist die PVC-Einlage naturgemäß so steif, dass sie kaum zusammengedrückt werden kann. Sehr wichtig ist dann, dass die Einlage auf Zimmertemperatur angewärmt wird. Dieser Zustand ist erreicht, wenn sich die Einlage mit den Fingern zusammendrücken lässt. Achten Sie aber unbedingt darauf, dass die Einlage nicht zu stark erhitzt wird, weil sie sich sonst erst ausdehnt und später schrumpft!

- 4 Wir empfehlen dringend, die PVC-Einlage mindestens punktuell zu verkleben, um eventuelle Schrumpfungen zu minimieren!

**The TK-System consists of 2 combined components:**

1. the metal stair nosings - of brass or aluminium
2. the PVC-insert (cut to fit)

**Fastening is very easy:**

- 1 The metal stair nosings have countersunk holes in their dovetailing guides (into which the inserts are subsequently fitted). They are fastened on the step by screwing them (for stone stairs use dowels). A perfect glue bond was successfully obtained.
- 2 The PVC-insert should be cut to the desired fixed size in cold condition.
- 3 The two new expansion joint on the back side allow to compress the tempered insert (at room temperature) and to fix it easily overhand into the dovetailing guide of the metal stair nosing!

**Attention! Very important!**

The PVC-insert will normally be taken to the building site in cold condition. Naturally the PVC-insert is so rigid in that condition that it can hardly be compressed. Then it is very important to heat the insert to room temperature. This condition is obtained when the insert can be compressed by your fingers. Take care, however, not to heat the insert more than necessary, because otherwise it will tend first to expand and then to shrink!

- 4 We recommend to glue the pvc insert punctually on the profile to prevent a possible shrinkage.

**Le système de nez de marches comprend 2 parties combinées:**

1. la barre de seuil pour marches en métal, laiton ou aluminium
2. l'insert en PVC (l'insert adapté)

**La pose est facile à réaliser:**

- 1 Les barres de seuils pour marches sont pourvues d'un percement noyé dans leur guidage de queue d'aronde (dans lequel l'insert sera introduit ultérieurement). Les barres de seuils sont vissées (si béton: chevillées) sur la marche. (L'encollage a également fait ses preuves.)
- 2 L'insert en PVC doit être coupé sur mesure à froid.
- 3 Grâce à la rainure longitudinale nouvellement conçue (encoche) il est possible d'insérer le support en PVC à température ambiante en appuyant bien et de l'introduire facilement - par le haut - dans le guidage de la queue d'aronde de la barre de seuils en métal pour nez de marches!

**Attention! Très important!**

En général l'insert en PVC est livré sur le chantier à l'état froid. Dans cet état l'insert est par nature si rigide qu'il ne peut à peine être pressé. Il est alors très important de réchauffer l'insert à température ambiante. Vous obtiendrez ce résultat en le pressant entre vos doigts. Veillez cependant à ce que l'insert ne soit pas trop réchauffé car il risquerait alors de s'étirer et après de se rétracter!

- 4 Il est vivement conseillé de coller les inserts en PVC par touche, afin d'éviter au maximum que les inserts se rétractent.

706

**Holzstufe mit LVT-, CV- oder PVC-Böden**

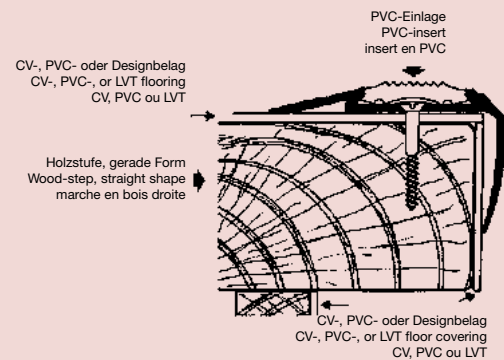

Das Profil wird direkt durch den LVT-, CV- oder PVC-Boden auf die Holzstufe verschraubt.

Wooden step with CV-, PVC-, or LVT-flooring

The profile is screwed directly through the PVC-flooring on the wooden step.

Marche en bois avec revêtement en CV, PVC ou LVT

Le seuil doit être directement vissé à travers le revêtement en CV, PVC ou LVT sur la marche en bois.

**Ausgetretene Betonstufe mit LVT-, CV- oder PVC-Böden**

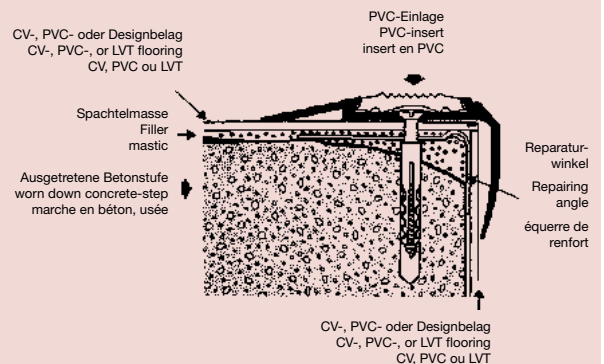

Reparaturwinkel (siehe Seite 119) montieren und mit Spachtelmasse den Tritt egalisieren, LVT-, CV- oder PVC-Böden verlegen. Das Profil wird direkt durch den LVT-, CV- oder PVC-Boden auf die Betonstufe verschraubt.

Worn-down concrete step with CV-, PVC-, or LVT-flooring

Screw repairing angle (see page 119) and flatten step with filler, lay CV-, PVC-, or LVT-flooring. The profile is screwed directly through the CV-, PVC-, or LVT-flooring on the concrete step.

Marche en béton usée avec revêtement en CV, PVC ou LVT

Visser l'équerre de renfort (cf. page 119) et égaliser la marche avec du mastic puis procéder à la pose du revêtement en CV, PVC ou LVT. Le seuil doit être directement vissé à travers le revêtement en CV, PVC ou LVT sur la marche en béton.

**Betonstufe mit ausgebrochenen Keramikplatten**

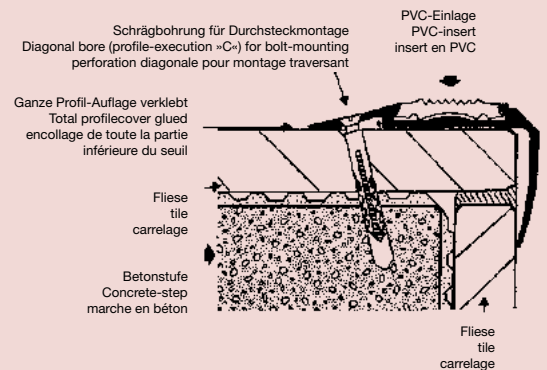

Das Profil wird direkt auf der gereinigten Plattenstufe verklebt und nach Aushärtung durch die Schrägbohrung verschraubt.

Concrete step with broken tiles

The profile is glued directly on the clean step and screwed through the diagonal bore after hardening.

Marche en béton avec carreaux de céramique cassés

Le seuil doit être collé directement sur la dalle nettoyée et vissé après durcissement dans la perforation diagonale.

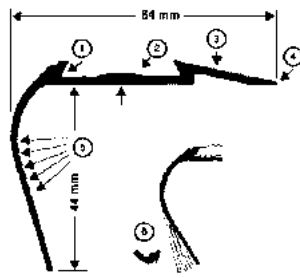

**Sicherheitstreppenkantenprofile** · für auswechselbare PVC-Einlagen  
**Safety stair nosings** · for exchangeable PVC-inserts  
**Nez de marches de sécurité** · pour inserts en PVC interchangeables

### Profile für gerundete Stufen aus Holz

- 1 PVC-Einlage
- 2 Stabilisierungswulst
- 3 rutschhemmende Längsrillen
- 4 Profil auslaufend
- 5 Sollbiegestellen
- 6 Anpassung an die Stufenform mit Hartholzzulage oder Schlagklotz möglich. (Hartholzzulage mit Filz)

Profiles for rounded wood-steps

- 1 PVC insert
- 2 stabilization bead
- 3 slip resistant longitudinal nerves
- 4 ending border part
- 5 predetermined bending points
- 6 Adaption to step shape by well-controlled hammer strokes is possible. (hardwood log with felt)

Seuils pour marches droites en béton, pierre et bois

- 1 insert en PVC
- 2 bourrelet de stabilisation
- 3 rainures longitudinales antidérapantes
- 4 terminaison du seuil
- 5 point destiné au pliage
- 6 ajustage à la forme de marche réalisable à l'aide de coups de marteau parfaitement dosés (cale en bois avec feutre)

707

### Ausgetretene Holzstufe, saniert mit LVT-, CV- oder PVC-Böden

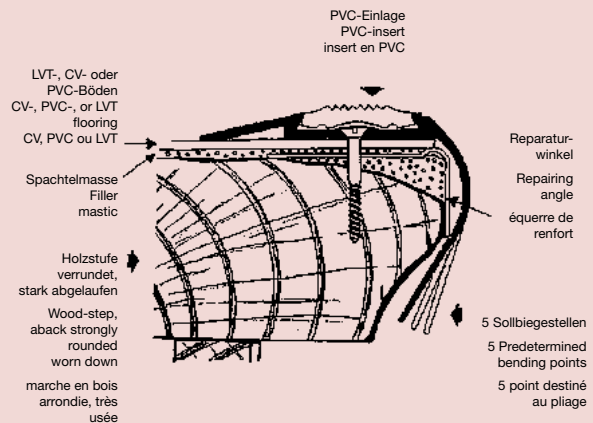

Reparaturwinkel (siehe Seite 119) montieren und mit Spachtelmasse den Tritt egalisieren, LVT-, CV- oder PVC-Böden verlegen. Das Profil wird direkt durch den LVT-, CV- oder PVC-Boden auf die Holzstufe verschraubt. Bei Bedarf die Profilnase mit dosierten Hammerschlägen und Hartholzzulage anpassen.

Worn-down wood-step refurbished with CV-, PVC-, or LVT-flooring

Fasten repairing angle (see page 119) with screws and flatten step with filler, lay CV-, PVC-, or LVT-flooring. Profile is screwed through the CV-, PVC-, or LVT-flooring on the wood-step. If necessary adapt profile nose by well-controlled hammer blows using a wooden bond.

Marches en bois usées, rénovées à l'aide de revêtement en CV, PVC ou LVT

Visser l'équerre de renfort (cf. page 119) et égaliser la marche avec du mastic, puis procéder à la pose du revêtement en CV, PVC ou LVT. Le seuil doit être directement vissé à travers le revêtement en CV, PVC ou LVT sur la marche en bois. Ajuster si nécessaire le nez du seuil à l'aide de coups de marteau parfaitement dosés et d'un support intermédiaire en bois.

### Holzstufe mit ausgetretenem Teppichbelag

Das Profil wird direkt durch den Teppichbelag auf die Holzstufe verschraubt:

- a) verdeckt unter der PVC-Einlage
- b) durch die Schrägbohrung

(Die beiden Bohrungsreihen sind versetzt im Profil angebracht). Bei Bedarf die Profilnase mit dosierten Hammerschlägen und Hartholzzulage anpassen.

Wood step with worn-down carpet

Screw profile directly on wood step through carpet:

- a) concealed under PVC-insert
- b) through diagonal bore

(both the bore rows are staggered in the profile)

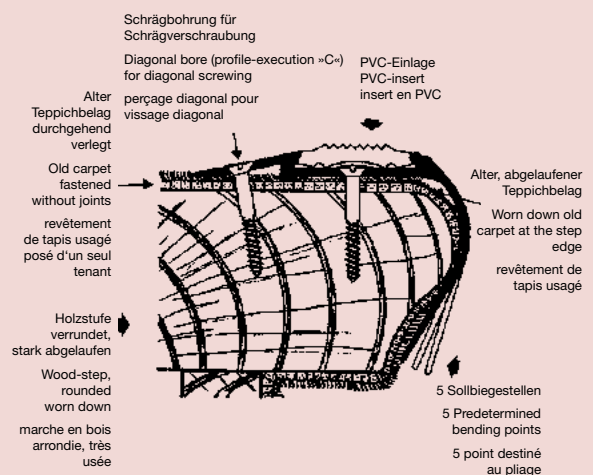

If necessary, adapt profile nose with well-controlled hammer blows using a wooden bond.

Marche en bois avec revêtement de tapis usé

Le seuil doit être directement vissé à travers le revêtement de tapis sur la marche en bois:

- a) vissage noyé sous l'insert en PVC
- b) vissage diagonal

(les deux rangs de perforation sont décalés dans le seuil) Ajuster si nécessaire le nez du seuil à l'aide de coups de marteau parfaitement dosés et d'une cale en bois.

**Maßanfertigung der runden Ecken (EC) • Customisation of round corners (EC) • Fabrication sur mesure des coins ronds (EC)**

- Unsere „runden“ 90°-Ecken können auf das gewünschte Maß gefertigt werden  
Our 'round' 90° corners can be manufactured to the desired dimensions  
Nos coins « ronds » à 90° peuvent être fabriqués à la dimension souhaitée
- Der Außenradius am gebogenen Profil beträgt ca. 10 mm (R10)  
The outer radius on the curved profile is approx. 10 mm (R10)  
Le rayon extérieur du profilé courbé est d'environ 10 mm (R10)
- Möglich sind L-, U- oder C-Form  
L, U or C shapes are possible  
Possibilité de forme en L, en U ou en C
- Die maximale Abwicklung eines Elements beträgt 5.000 mm (einteilig)  
The maximum unfolding of an element is 5,000 mm (one-piece)  
Le développement maximal d'un élément est de 5.000 mm (en une seule pièce)
- Von 90° abweichende Winkelstellungen sind ebenfalls möglich  
Angle positions deviating from 90° are also possible  
Des positions angulaires différentes de 90° sont également possibles
- Wir können in unserer Manufaktur runde Ecken mit Winkeln von 45° - 150° fertigen  
We can produce round corners with angles of 45° - 150° in our factory  
Nous pouvons fabriquer dans notre manufacture des coins ronds avec des angles de 45° à 150°
- Die Winkel der Befestigungsschenkel am Verbinder werden bei diesen Sonderwinkeln auf das benötigte Maß gebogen  
With these special brackets, the angles of the fastening legs on the connector are bent to the required dimension  
Pour ces équerres spéciales, les angles des branches de fixation sur le connecteur sont pliés à la dimension nécessaire

**Maßanfertigung der runden Ecken mit Verbinder (EV) • Customised round corners with connector (EV) • Fabrication sur mesure des coins arrondis avec connecteur (EV)**

- Für die Verlegung von Podesten oder bei der Verkleidung von Vorwandelementen wie WC, Waschtisch oder Trockenbau können auf Wunsch längere Verbinder gefertigt werden  
Longer connectors can be manufactured on request for the installation of pedestals or when panelling pre-wall elements such as WCs, washbasins or drywall construction  
Des raccords plus longs peuvent être fabriqués sur demande pour la pose de podiums ou pour l'habillage d'éléments en applique comme les WC, les lavabos ou les cloisons sèches
- Die runden Ecken mit Verbinder können auch bei Wandvorsprüngen, Fensterbänken oder Rolladenkästen eingesetzt werden  
The round corners with connectors can also be used for wall projections, window sills or roller shutter boxes  
Les coins ronds avec raccord peuvent également être utilisés pour les saillies murales, les rebords de fenêtre ou les caissons de volets roulants
- Durch eine Fräsbearbeitung wird der Außenradius bei dem Verbinder auf das gleiche Maß gebracht wie das gebogene Element (R10)  
The outer radius of the connector is milled to the same size as the bent element (R10)  
Grâce à un usinage, le rayon extérieur du connecteur est amené à la même dimension que l'élément courbé (R10)
- Die Verbinder können **nicht** durch die normalen Treppenkantenprofile vom gleichen Typ ersetzt werden, weil dann die Radien nicht übereinstimmen  
The connectors **cannot** be replaced by the normal stair nosing profiles of the same type, as the radii would then not match  
Les raccords **ne peuvent pas** être remplacés par des profils de nez de marche normaux du même type, car les rayons ne correspondent pas
- Bei Bestellungen der runden Ecken mit Verbinder daher bitte die benötigte Länge des Verbinders mit angeben, wenn dieser >200 mm sein soll  
When ordering the round corners with connector, please specify the required length of the connector if it is to be >200 mm  
Lors de la commande de coins ronds avec raccord, veuillez indiquer la longueur nécessaire du raccord si celui-ci doit être >200 mm

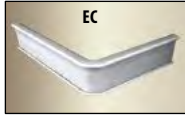

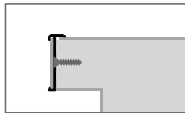

**Treppenkantenprofile** · mit runden Ecken für LVT-, CV- und PVC-Böden  
**Stair nosings** · with rounded edges for LVT-, CV- and PVC-flooring  
**Nez de marches** · avec bords arrondis pour revêtements de sol en LVT-, CV et PVC

**Türstopper aus Messing, massiv**  
 door stopper made of brass, solid  
 butoir de porte laiton, massif

**mit Spreitzdübel und Stockschraube mit Dübel**  
 with expansion anchor and hangerbolt with dowel  
 avec cheville extensible et vis avec cheville

**Ganz einfach zu montieren:**

Im Bodenbelag ab 7,5 mm ein Loch bohren (Ø = 8 mm), Metalldübel mit dem Hammer leicht einschlagen und Türstopper darauf verschrauben. Fertig! Das Dübelssystem beschädigt nicht den Estrich und ist deshalb ideal für Fußbodenheizung oder schwimmende Verlegung geeignet. Zusätzlich geliefert mit Stockschraube und Dübel für Estrich, Fliesen- und Natursteinböden.

**Easy to install:**

For floor coverings of more than 7,5 mm thickness drill a hole of minimum 8 mm Ø, fix the metal dowel slightly with a hammer and screw the door stopper. Finished! The dowel system does not cause any damages on the concrete and is suitable for underfloor heating or for floating floors. Delivered additionally with hanger bolt and dowel for fixing on concrete, floors with ceramic tiles or natural stones.

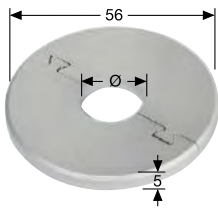

**Montage facile:**

En cas de revêtements de sol d'une épaisseur de plus de 7,5 mm, percer un trou de 8 mm Ø minimum, fixer la cheville en métal à l'aide de coups de marteau parfaitement dosés puis visser le butoir de porte. Voilà, c'est fini! Ne cause pas de détériorations dans le béton. C'est la solution idéale pour un chauffage au sol.

\* Messing-Preise können sich ändern! · Brass prices may change! · Les prix du laiton peuvent subir des variations!

**Biegen von Profilen**

Bögen, Kreise und geschwungene Linienführung sind bei der Gestaltung von Bodenbelägen in der modernen Objekt- und Wohneinrichtung nicht mehr wegzudenken. Sie sind die ideale Möglichkeit, um Flächen akzentuiert zu segmentieren, um Laufzonen oder Meeting-Points voneinander abzugrenzen oder gestalterische Highlights auf dem Boden zu setzen. Vor allem durch die Kombination unterschiedlicher Materialien werden effektvolle Eye-Catcher realisierbar. Bei derartig anspruchsvollen Verlegeaufgaben, bei denen es auf sauber laufende Abschlüsse oder Trennungen z.B. zwischen textilen, elastischen, keramischen oder Parkettböden ankommt, sind hochwertige Materialien und unterstützende bzw. die Arbeit erleichternde Werkzeuge für das bodenlegende Handwerk entscheidend.

**Biegen von Profilen – vor Ort oder Werksseitig**

Als Systementwickler führen wir für die unterschiedlichsten Aufgabenstellungen inzwischen fast 60 verschiedene biegbare Profil-Varianten (EB-Profile) im Sortiment. Dabei liefern wir nicht nur die biegbaren Profile aus Aluminium oder Messing, sondern mit der eigens dafür entwickelten Küberit®-Biegemaschine auch ein komfortables Werkzeug, mit dem Biegungen in diversen Radien schnell und sicher umzusetzen sind.

Sollten Sie spezielle Anforderungen an das zu biegende Profil haben oder die gewünschten Biegungen sind nur auf mechanischem Weg zu erzielen, dann fertigen wir für Sie auch individuell gebogene Profile als Sonderanfertigung.

Beispiele von Profiltypen, die nach Vorgabe gebogen werden können: **332, 250 S** oder **376**

**Säulenringe aus Aluminium in individuellen Durchmessern, Sonderformen und Sonderfarben fertigen wir in unserer Manufaktur nach Ihren Vorgaben.**

Insbesondere, wenn im Objektbereich eine Metallsockelleiste vorgeschrieben wird, da es der Brandschutz vorgibt, kommen unsere Sockelleisten zum Einsatz. Dauerhaftigkeit, Design und eine einfache Montage sind oft mit entscheidend, wenn man sich für Sockelleisten aus Metall entscheidet. Bei der Herausforderung, gerundete Lösungen zu entwickeln, hilft die Küberit®-Manufaktur, die fehlenden Komponenten herzustellen.

EN

**Bending of profiles**

Arcs, circles and curved lines have become indispensable in the design of floor coverings in modern commercial and residential facilities. They are the ideal way to accentuate the segmentation of surfaces, to separate walking zones or meeting points or to set design highlights on the floor. The combination of different materials in particular makes it possible to create effective eye-catchers. For such demanding installation tasks, where cleanly running borders or separations, e.g. between textile, elastic, ceramic or parquet floors, are important, high-quality materials and supporting or work facilitating tools for the floor laying trade are decisive.

**Bending of profiles - on site or at the factory**

As a system developer, we now have almost 60 different bendable profile variants (EB profiles) in our product range for a wide variety of tasks. Thereby we do not only supply the bendable profiles made of aluminium or brass, but with the specially developed Küberit® bending machine also a comfortable tool, with which bends in different radii can be realized fast and safe.

If you have special requirements to the profile to be bent or the desired bends can only be achieved mechanically, we also produce individually bent profiles as special design.

Examples of profile types that can be bent to specification: **332, 250 S** or **376**

**We manufacture aluminium column rings in individual diameters, special shapes and special colours in our factory according to your specifications.**

Our skirting boards are used in particular when a metal skirting board is prescribed in the commercial sector due to fire protection requirements. Durability, design and easy installation are often decisive factors when choosing metal skirting boards. When it comes to the challenge of developing rounded solutions, Küberit®-Manufaktur helps to produce the missing components.

FR

**Cintrage des profilés**

Les arcs, les cercles et les lignes courbes sont devenus indispensables dans la conception des revêtements de sol dans les installations commerciales et résidentielles modernes. Ils sont le moyen idéal pour accentuer la segmentation des surfaces, pour séparer les zones de passage ou les points de rencontre ou pour mettre en valeur le design au sol. La combinaison de différents matériaux permet notamment de créer des accroches efficaces. Pour ces tâches de pose exigeantes, où des bordures ou des séparations propres, par exemple entre des sols textiles, élastiques, céramiques ou en parquet, sont importantes, des matériaux de haute qualité et des outils de support ou de facilitation du travail pour le métier de poseur de sols sont décisifs.

**Cintrage de profilés - sur site ou en usine**

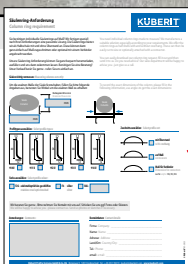

En tant que développeur de systèmes, nous disposons aujourd'hui de près de 60 variantes de profilés pliables (profilés EB) dans notre gamme de produits pour les tâches les plus diverses. Ainsi, nous ne fournissons pas seulement les profilés cintrables en aluminium ou en laiton, mais avec la cintruse Küberit® spécialement développée, un outil confortable, avec lequel des cintrages dans différents rayons peuvent être réalisés rapidement et en toute sécurité.

Si vous avez des exigences particulières quant au profilé à cintrer ou si les cintrages souhaités ne peuvent être réalisés que mécaniquement, nous fabriquons également des profilés cintrés individuellement en tant que modèle spécial.

Exemples d'autres types de profilés qui peuvent être pliés selon les spécifications : **332, 250 S** ou **376**

**Nous fabriquons dans notre manufacture des bagues de colonne en aluminium de diamètres individuels, de formes et de couleurs spéciales, selon vos indications.**

Nos plinthes sont utilisées en particulier lorsqu'une plinthe métallique est prescrite dans le domaine des bâtiments publics en raison de la protection contre les incendies. La durabilité, le design et la facilité de montage sont souvent des facteurs décisifs dans le choix de plinthes en métal. Face au défi de développer des solutions arrondies, la manufacture Küberit® aide à fabriquer les composants manquants.

Hier finden Sie das Formular zu den Anforderungen für gebogene Säulenringe  
 Here you will find the form for the requirements for curved pillar rings  
 Vous trouverez ici le formulaire relatif aux exigences pour les anneaux de colonnes courbes

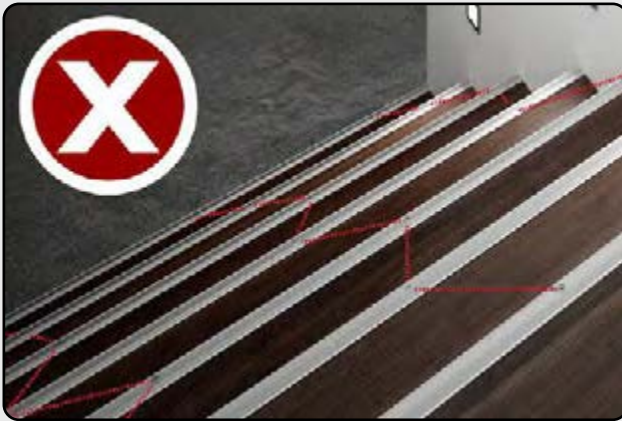

DE

**Sonderzuschnitte für unsere Profile, Profilsysteme und Treppenstangen**

Generell können wir alle Aluminium-, Messing- und Edelstahl-Profile sowie natürlich auch Treppenstangen als Sonderzuschnitte bzw. Fixmaße abweichend von den Standardlängen gemäß unseren Preislisten liefern.

Teilen Sie uns einfach die gewünschten Abmessungen mit.

Wenn die Bohrlöcher bei Treppenkanten sichtbar sind, dann wird durch einen einheitlichen Randabstand (von links aus gesehen) ein optisch gleichmäßiger Verlauf gewährleistet. Zudem sind generell immer alle Bohrlöcher eloxiert, so dass nach dem Verschrauben kein blankes Metall sichtbar ist.

Der Vorteil von Sonderzuschnitten liegt auf der Hand – problemloser Transport zu der Baustelle (auch in Ballungszentren) und sofortige Verarbeitungsmöglichkeit. Damit kann vor Ort viel Zeit, Lärm und Dreck eingespart werden.

**Küberit®** fertigt einen Großteil seiner Profile in Längen von 5,0 m. Natürlich sind für die Baustelle auch Zuschnitte aus den Produktionslängen 2,7 m und 3,0 m möglich. Innerhalb kürzester Zeit liefern wir die gewünschte Menge an konfektionierten Artikeln. Während der Produktion der Profile unterscheiden wir zwischen den Profilen mit sichtbarer und unsichtbarer (Bodenbelag verdeckt die Schraublöcher) Verschraubung. Bei Bohrlöchern auf der Sichtseite der Treppenkanten, gewährleisten wir durch einen einheitlichen Randabstand einen optisch gleichmäßigen Verlauf der Bohrlöcher.

Auch größere Mengen an zugeschnittenen Profilen, vor allem bei Treppenanlagen mit mehreren hundert Stufen, können wir auf Anfrage gerne produzieren.

**Und so einfach gehts:**

Sie senden uns eine Anfrage an [kueberit@kueberit.com](mailto:kueberit@kueberit.com). Folgende Angaben benötigen wir: Profil- oder TLS-Typ, gewünschte Länge, Farbe, Ausführung, mit oder ohne Befestigung, Kommissionsangabe und gewünschten Liefertermin.

Gerne können Sie auch eine Skizze anfügen. Sie erhalten kurzfristig ein baustellenspezifisches Angebot mit termingerechter Lieferzeit. Nach Auftragserteilung durch Sie beginnen wir mit der Produktion. Der Versand erfolgt termingerecht an ihr Lager. Natürlich können nach Absprache auch Baustellenanlieferungen berücksichtigt werden.

EN

**Customised cuts for our profiles, profile systems and stair rods**

In general, we can supply all aluminium, brass and stainless steel profiles and, of course, stair rods as special cuts or fixed dimensions deviating from the standard lengths according to our price lists.

Simply let us know the dimensions you require.

If the drill holes are visible on stair nosings, a uniform edge distance (seen from the left) ensures a visually even finish. In addition, all drill holes are always anodised so that no bare metal is visible after screwing.

The advantage of special cuts is obvious - easy transport to the construction site (even in urban centres) and immediate processing. This saves a lot of time, noise and dirt on site.

**Küberit®** manufactures the majority of its profiles in lengths of 5.0 m. Naturally, it is also possible to cut to size from the production lengths of 2.7 m and 3.0 m for the construction site. We deliver the desired quantity of ready-made articles within a very short time. During the production of the profiles, we differentiate between profiles with visible and non-visible (floor covering covers the screw holes) screw fittings. In the case of drill holes on the visible side of the stair nosing, we ensure that these are evenly spaced around the edges.

We can also produce larger quantities of cut-to-size profiles on request, especially for staircases with several hundred steps.

**And it's this simple:**

Send us an inquiry to [kueberit@kueberit.com](mailto:kueberit@kueberit.com). We need the following information: Profile or stairrod type, desired length, color, design, with or without fastening, order specification and desired delivery date.

You are also welcome to attach a sketch. You will receive a construction site-specific quotation with an on-time delivery time. Once you have placed your order, we will start production. Shipment is made to your warehouse on schedule. Of course, deliveries to construction sites can also be taken into account by arrangement.

FR

**Découpes spéciales pour nos profilés, systèmes de profilés et tringles d'escalier**

En général, nous pouvons livrer tous les profilés en aluminium, en laiton et en acier inoxydable, ainsi que les tringles d'escalier, sous forme de découpes spéciales ou de dimensions fixes différentes des longueurs standard indiquées dans nos listes de prix.

Il vous suffit de nous communiquer les dimensions souhaitées.

Si les trous de perçage sont visibles sur les nez de marche, une distance uniforme entre les bords (vu de gauche) garantit un tracé optiquement régulier. En outre, tous les trous de perçage sont généralement toujours anodisés, de sorte qu'aucun métal nu n'est visible après le vissage.

L'avantage des découpes spéciales est évident - transport sans problème jusqu'au chantier (même dans les grandes agglomérations) et possibilité de traitement immédiat. Cela permet d'économiser beaucoup de temps, de bruit et de saleté sur place.

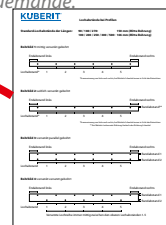

**Küberit®** fabrique une majeure partie de ses profilés en longueur de 5 m. Il est possible de fabriquer pour vos chantiers des coupes spéciales issues de nos longueurs de production de 2,7 m et de 3,0 m. Rapidement nous pouvons vous livrer les quantités souhaitées. Lors de la production des profilés, nous faisons une distinction entre les profilés avec fixation par vis visible ou non visible (le revêtement couvre les perçages). Pour les trous de perçage sur la partie visible du nez de marche, nous mettons en oeuvre un écart régulier par rapport au bord du profilé, ainsi que des perçages uniformes sur la longueur pour l'aspect visuel.

Nous pouvons également produire sur demande de plus grandes quantités de profilés coupés, notamment pour les cages d'escalier de plusieurs centaines de marches.

**Voici comment cela fonctionne:**

Envoyez-nous votre demande à [kueberit@kueberit.com](mailto:kueberit@kueberit.com). Nous avons besoins des informations suivantes: Type de profilé ou tringle d'escalier, la longueur souhaitée, le coloris, la version, avec ou sans fixation, votre référence chantier et le délai de livraison souhaitée.

Vous pouvez également nous joindre un schéma. Nous vous envoyons une offre de prix spécifique avec le délai de livraison. Après validation de la commande de votre part, nous commençons la production. La livraison est effectuée selon le délai indiqué. Nous pourrons également vous proposer une livraison sur chantier sur demande.

Hier finden Sie das Formular zu Lochabständen bei Profilen

Here you will find the form for hole spacing for profiles

Vous trouverez ici le formulaire sur les distances entre les trous des profilés

## DE

Um eventuelle Missverständnisse zu vermeiden, bitten wir Sie höflich um Beachtung der nachfolgenden Hinweise, die zusammen mit unseren Verkaufs- und Lieferungsbedingungen feste Bestandteile jedes Kaufvertrages sind und durch Ihre Bestellung als vereinbart anerkannt werden:

### Auftragserteilung

Bitte erteilen Sie uns Ihre Aufträge per E-Mail. So sind Missverständnisse ausgeschlossen. Bei telefonischen oder mündlichen Aufträgen ist es, trotz der Sorgfalt unserer Mitarbeiter, nicht völlig auszuschließen, dass sich ein Übermittlungsfehler einschleicht. Bitte kontrollieren Sie darum grundsätzlich unsere jeweilige Auftragsbestätigung, ob wir den Auftrag in Ihrem Sinne erfasst haben.

### Preise

Preise mit Vermerk „netto“ = ohne Rabatt. Preisänderungen müssen wir uns - je nach Beschaffungslage - täglich vorbehalten. Die Preise dieses Kataloges verstehen sich in EUR ohne die gesetzliche Mehrwertsteuer!

Änderungen und technische Verbesserungen aller Artikel behalten wir uns vor.

Zusätzlich zu dem Katalogpreis für eine komplette Verpackungseinheit (volle VE) weisen wir bei einer Vielzahl von Positionen den Anbruchpreis aus (keine volle VE). Preisangabe für den Anbruchpreis siehe „<VE“.

### Produkthaftung /

#### Freistellungserklärung

Die Firma Küberit Profile Systems in 58513 Lüdenscheid verpflichtet sich, ihrem Kunden Entschädigungen zu ersetzen, die der Kunde aufgrund gesetzlicher Haftpflicht wegen eines Personen- oder Sachschadens hat leisten müssen. Dies gilt nur für Schäden, die nachweislich auf einen von der Firma Küberit Profile Systems in 58513 Lüdenscheid, verursachten Produktfehler zurückzuführen sind.

Die Festlegung erfolgt nur in dem Umfang, in dem der Schaden von der Firma Küberit Profile Systems in 58513 Lüdenscheid verursacht ist.

### Eloxal-Farben

Eine immer gleichbleibende Eloxal-Farbe kann aus chemisch-technischen Gründen nicht garantiert werden! Dies gilt für **alle** Eloxal-Farben!

Bei der Eloxalfarbe edelstahloptik (F2/F2G) handelt es sich um edelstahlfarbene Aluminium Profile.

### Messing verchromte Profile

Ausgewählte Messingprofile sind unter Berücksichtigung von Mindestabnahmemengen auch in verchromter Ausführung erhältlich. Angaben zu Preisen und Lieferzeiten erhalten Sie auf Anfrage.

## EN

*In order to avoid possible misunderstandings, we kindly ask you to pay attention to the following hints, which are as well as our sales and delivery conditions a firm part of each purchasing contract and are regarded as accepted by your order.*

### Placing orders

*In case of oral orders or orders placed by telephone or e-mail we cannot totally exclude that there might be mistakes in understanding despite the diligence of our salesmen. Therefore please check the corresponding order confirmation, if we booked the order according to your requests.*

### Prices

*Prices with the note "net" = without discount. Prices are subject to alterations. We have to reserve the right of changing our prices daily depending on the supply circumstances.*

*Modifications and technical improvements of all articles are subject to change without notice.*

*In addition to the catalog price for a complete packaging unit (full PU), we show the break-open price for a large number of items (no full PU). See "<VE" for the quotation of the break-off price.*

### Product Liability /

#### Deed of release (EU)

*The company Küberit Profile Systems, 58513 Lüdenscheid, Germany, is committed to replace customers damages, that the customer had to pay as compensation due to legal liability because of personal injury or material damage. This is only valid for damage evidently caused by a product fault of the company Küberit Profile Systems, 58513 Lüdenscheid, Germany.*

*The regulation will only be accepted within the scope in which the damage is caused by the company Küberit Profile Systems, 58513 Lüdenscheid, Germany.*

### Anodized colours

*Due to chemical-technical reasons we cannot guarantee constant anodized colours. This applies to **all** anodised colours!*

*The anodized color stainless steel optic (F2/F2G) are stainless steel imitation on aluminium profiles.*

### Brass chromium plated profiles

*For a minimum quantity, we offer selected profile types in brass chromium plated. Information referring to prices and delivery time will be available on requested.*

## FR

*Afin d'éviter d'éventuelles confusions, nous vous prions de bien vouloir prendre note des informations suivantes qui font partie intégrante de chaque contrat de vente avec nos conditions de livraison et de vente et sont considérées comme acceptées à compter de la passation de votre commande :*

### Passation de commande

*Merci de bien vouloir nous envoyer vos commandes par fax ou e-mail et ce, afin d'éviter toute erreur. Nous vous prions également de bien vouloir vérifier notre confirmation de commande, à savoir si la commande a bien été enregistrée conformément à votre demande.*

### Prix

*Les prix avec la mention »net« sont des prix avec remise maximum. Les prix pouvant être ajustés à tout moment car étant fonction de la conjoncture, nous nous réservons ainsi le droit de les modifier.*

*Tous nos articles sont sous réserve de modifications et d'améliorations techniques.*

*Outre le prix catalogue pour une unité d'emballage complète (UP complète), nous indiquons le prix de rupture pour un grand nombre d'articles (pas d'UP complète). Voir „<VE" pour la cotation du prix de rupture.*

### Responsabilité du fabricant / déclaration d'exemption (EU)

*La Société Küberit Profile Systems, 58513 Lüdenscheid, Allemagne, s'engage à indemniser les dommages que le client aurait dû payer selon la responsabilité civile pour dommage corporel ou matériel. Cela s'applique seulement aux dommages incontestablement prouvés comme ayant été causés par une faute-produit de la part de la Société Küberit Profile Systems, 58513 Lüdenscheid, Allemagne.*

*La légitimité a lieu seulement dans la mesure où le dommage a été causé par la Société Küberit Profile Systems, 58513 Lüdenscheid, Allemagne.*

### Coloris anodisés

*Nous ne pouvons garantir une anodisation parfaitement identique pour un même coloris et ce, en raison des facteurs techniques et chimiques! Ceci est valable pour **toutes** les couleurs anodisées!*

*Le coloris anodisé optique acier inoxydable (F2/F2G) est une teinte imitation acier inox pour les profilés en aluminium.*

### Profilés en laiton chromé

*Les profilés choisis en laiton sont aussi disponibles en version laiton chromé à condition d'une quantité minimum d'achat. Vous recevez sur demande les indications des prix et temps de livraison.*

### Fixmaße, Sonderzuschnitte

Alle lieferbaren, aufschlagfreien Längen und Stücke unseres Programms, sind klar und deutlich in der Spalte VE (Verpackungseinheit) aufgeführt. Davon abweichende Sonderzuschnitte / Fixmaße bedingen folgende Aufschläge:

Fixmaße für **Sonderlängen**: Materialbedarf zzgl. 15% Schneideaufschlag netto

#### Achtung!

Die Sägeblattstärke von 5,0 mm ist zu berücksichtigen!

Folgende Maßtoleranzen gem. DIN ISO 2768-1 sind bei Fixmaßen / Sonderzuschnitten generell zu berücksichtigen:

Länge: 400 - 1.000 mm = ± 0,8 mm

Länge: 1.000 - 2.000 mm = ± 1,2 mm

Länge: 2.000 - 4.000 mm = ± 2,0 mm

#### Maße

Die angegebenen Maße sind Richtwerte. Abweichungen davon müssen wir uns vorbehalten.

#### Mindermengenzuschlag

Bei Aufträgen mit einem Netto-Warenwert unter 100,- EUR müssen wir einen zusätzlichen Mindermengenzuschlag in Höhe von 12,- EUR je Sendung berechnen.

Alle früheren Kataloge werden hierdurch ungültig.

#### Lieferbedingungen Inland

(deutsches Festland)

unter 450,- Netto-Warenwert = unfrei,

ausschließlich Verpackung,

ab 450,- Netto-Warenwert = frei Haus,

### Fixed measures, special blanks

All available lengths and pieces without extra charges die listed clearly far in the column VE (packing unit). Length we charge as follows:

Fixed measures for **special lengths**: Total amount of material additional surcharge of 15%

#### Caution!

Pay attention to the saw blade thickness of 5,0 mm!

Pay attention to the following length tolerances according to DIN ISO 2768-1 for special custom lengths:

Length: 400 - 1000 mm = ± 0,8 mm

Length: 1000 - 2000 mm = ± 1,2 mm

Length: 2000 - 4000 mm = ± 2,0 mm

#### Measures

The indicated measures are approximate values, subject to deviations.

#### Order volume / minimum orders

We have to charge an additional Express- and handling fee of 12,- Euro for orders of less than 100,- Euro net order volume.

All former catalogues and prices get invalid with publication of this catalogue.

#### Terms of delivery unless otherwise negotiated

Ex works

#### Discontinued product (◆)

Delivery subject to availability!

## FR

### Coupes sur mesure et coupes spéciales

Toutes les longueurs et pièces de notre programme disponibles et ne faisant pas l'objet d'un surcoût sont indiquées clairement dans la colonne VE (unité d'emballage). Néanmoins il n'en est pas de même pour les coupes sur mesure / coupes spéciales dont voici les surcoûts:

Coupes sur mesure pour **longueurs spéciales**: montant total du matériel majoré de 15% de frais de découpe

#### Attention!

Veillez bien tenir compte de l'épaisseur de 5,0 mm de la lame de scie!

Les tolérances suivantes des mesures conformes à DIN ISO 2768-1 sont à prendre en compte pour mesures fixes et coupes exceptionnelles:

Longueur: 400 - 1000 mm = ± 0,8 mm

Longueur: 1000 - 2000 mm = ± 1,2 mm

Longueur: 2000 - 4000 mm = ± 2,0 mm

#### Mesures

Les mesures mentionnées sont des valeurs indicatives sous réserve de légères modifications.

#### Quantité commandée / Minimum de commandes

Nous devons facturer 12,- euro de frais supplémentaires pour traitement express sur les commandes dont la quantité est inférieure à 100,- euro net.

La validité de tous les autres catalogues précédents est annulée par la présente.

#### Article discontinué (◆)

Livable jusqu'à épuisement du stock!

In der Regel sind auf Anfrage zusätzliche Farben oder Längen unserer Profile erhältlich. Möglicherweise stehen auch Alternativen zu dem angefragten Produkt zur Verfügung. Bitte wenden Sie sich an Ihren Küberit-Fachberater.

As a rule, additional colours or lengths of our profiles are available on request.

Alternatives to the requested product may also be available.

Please contact your Küberit consultant.

En règle générale, des couleurs ou des longueurs supplémentaires de nos profilés sont disponibles sur demande. Il est également possible que des alternatives au produit demandé soient disponibles.

Veillez vous adresser à votre conseiller Küberit.

**DE**

**Hinweis zu Farbabweichungen**

Farbabweichungen zwischen der Darstellung in unseren Katalogen und auf unserer Webseite, entsprechend dem Ausdruck des Druckers und der Darstellung am Monitor, stellen technisch bedingt nicht reelle Farben der Materialien und der verschiedenen Ausführungen / Farben dar. Bitte bestellen Sie bei uns Muster der Materialien und Farben, wenn gewünscht.

**Hinweis zu Längen, Versionen und Material**

Bei den Profilen sind zum Teil weitere Farben, Längen oder Versionen lieferbar. Bitte kontaktieren Sie uns. Änderungen bleiben vorbehalten.

**Farbabweichungen bei Digitaldruck-Dekoren**

Die Dekorabbildungen stellen nur die Produktoptik dar. Dies liegt oftmals daran, dass die meisten Drucker und Monitore nicht kalibriert sind und es zu optischen Farbverschiebungen kommen kann. Sie ist keineswegs farbverbindlich, da weder der CMYK-Farbmodus noch eventuelle Druckveredelungen dargestellt werden können. Die Ausgabe am Monitor erfolgt stattdessen immer im RGB-Modus. Auch die Auflösung ist nicht originalgetreu.

**Wichtiger Hinweis**

Unsere TOP-Profile werden nicht einfach im pressblanken Rohzustand ummantelt, sondern in einem zusätzlichen Verfahren behandelt, um eine starke und bleibende Haftung zu gewährleisten! – Ummantelung mit Holzdekoren: Oberflächenbeschichtung mit hochabriebfester Folie

**EN**

**Note about colour variations**

Color representation will vary between our catalogues and website with printouts from printers and monitor displays. These cannot technically represent the true colour of the materials and the different finishes/colours. Please feel free to order samples of materials and colours from us.

**Note on lengths, versions and material**

Some profiles are available in other colours, lengths or versions. Please contact us for further information. We reserve the right to make changes.

**Colour variations in digital printing decors**

The decorative images only approximate the product appearance. This is often because most printers and monitors are not calibrated and there may be optical colour shifts. The colours are not guaranteed to be accurate or reproducible, as neither the CMYK colour mode nor any print finishes can be displayed. Instead, the output on the monitor is always in RGB mode. The resolution is not true to the original.

**Important information**

To guarantee a strong and long adhesive strength of the foil, our TOP profiles are treated in an additional process. – Coating with wood decors: Surface coating with a high abrasion resistant foil

**FR**

**Remarque sur les déviations de couleur**

Des différences de couleur peuvent exister entre la représentation dans nos catalogues et sur notre site Internet, selon l'impression de votre imprimante et la représentation à l'écran. Celles-ci ne représentent pas les couleurs techniques réelles des matériaux et des différentes finitions/couleurs. Si vous le souhaitez, vous pouvez nous commander des échantillons de matériaux et de couleurs.

**Remarque sur les longueurs, les versions et le matériau**

Certains profilés sont disponibles dans d'autres couleurs, longueurs ou versions. N'hésitez pas à nous contacter pour de plus amples informations. Sous réserve de modifications.

**Déviations de couleurs des décors en impression numérique**

Les illustrations de décors ne donnent qu'une idée approximative de l'optique du produit. Ceci est fréquemment lié au fait que la plupart des imprimantes et moniteurs ne sont pas calibrés, pouvant provoquer des déviations optiques des couleurs. Les couleurs des illustrations ne sont en aucun cas engageantes, car ni le mode CMJN ni des éventuellement améliorations d'impression ne peuvent être représentés. L'édition sur le moniteur a lieu au contraire toujours en mode RVB. La résolution n'est pas non plus fidèle à l'original.

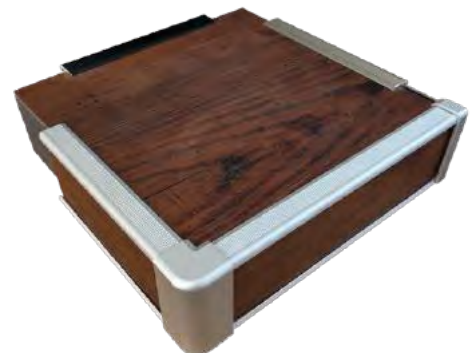

**Information importante**

Pour réaliser un haut niveau de qualité durable de nos seuils, ceux-ci ne sont pas revêtus simplement à l'état brut de presse mais sont traités ultérieurement! – Feuille décorative/Revêtement: Les feuilles décoratives sont traitées pour les rendre plus résistantes à l'abrasion.
